

# Medical Care and Health

## Health Care

### 1. Health Administration Center in Gifu University

The Health Administration Center gives first-aid medical treatments, conducts annual health check-ups and provides physical/mental counseling services for Gifu University students. The newly-enrolled students need to undergo medical check in April or October. All students including international students and non-degree seeking students (research students and auditors) have to go through a health check-up every year without fail. The detailed schedule will be shared through e-mail and Aims-GIFU.

### 2. Hospital/Clinic

Having a National Health Insurance is absolutely necessary while you are living in Japan, since insurance covers 70% of the total medical expenses. Please inform your faculty/graduate school office as soon as possible if you got any medical issues.

Hospitals and clinics location map is available at;

### 3. Emergency

Please call 119 for ambulance if you become seriously ill or get injured and inform them of your exact locations. Ambulance fee is free in Japan. However, please call only in case of emergencies.
