

Tokai National Higher Education and Research System

GIFU UNIVERSITY

2024

GIFU UNIVERSITY

President's Message

In April 2020, Gifu University marked a historic milestone by becoming the first academic institution in Japan to undergo corporate integration by amalgamating with Nagoya University. Operating under the new Tokai National Higher Education and Research System, or 'THERS,' we have achieved numerous accomplishments. We are now embracing our new role as a core regional university, the latest stage in our long, evolving development.

Within the main mission of THERS, to '*Make New Standards for the Public*,' underpinned by Gifu University's ideals of '*Learning, Exploring, and Contributing*,' we are moving closer to our vision of becoming a pivotal center for regional revitalization. This vision, founded in the strategic promotion of community collaboration, distinctive research, innovation, and education, aims at addressing the challenges faced by region, Japan and the world. With a global perspective, to bring this to fruition, we have formulated the following.

Capitalizing on our strengths in 'Creation of Businesses and Community-Building,' 'Product Manufacturing,' 'Food Manufacturing,' 'Development of New Medical Systems,' and 'Human Resource Development,' we and our stakeholders have fostered a virtuous cycle of societal contributions through the synergy of education and research, propelling our region forward. We have named this dynamic process the 'MLIE (Migration, Laboratory, Innovation, Education) Concept,' and we follow it as Gifu University's model for value creation.

To achieve these objectives, our initial policy is the advancement of THERS Research Hub Collaboration Support Project. This project unifies the capabilities of Nagoya and Gifu universities, blending both our unique strengths and resources to generate potent success. THERS six hubs have received accreditation as a result.

One of the notable achievements of THERS' six hubs is the development of the Institute for Glyco-core Research (iGCORE). As a world-leading research center in glycobiology, iGCORE spearheads the ambitious 'Human Glycome Atlas Project (HGA),' a major cutting-edge initiative of the Ministry of Education, Culture, Sports, Science and Technology (MEXT) of Japan. In May 2023, the iGCORE Gifu Research building was inaugurated on our campus. Furthermore, the 'Aerospace Research and Education Hub (AREH)' has achieved significant advances. In collaboration with the Gifu Prefectural government, it is actively engaged in research and development to launch a 'Cyber-Physical Factory.' This project aims to bolster a variety of manufacturing sectors, with a special focus on the aerospace industry. The Hub has recently secured government backing for its new phase of expansion.

The 'Center for One Medicine Innovative Translational Research (COMIT)' stands as a pioneering nexus in life sciences, merging advancements in medical treatments and drug discovery across multiple disciplines. These include medicine, veterinary science, and pharmaceutical science. The contributions of food science, agriculture, and bioengineering from the Faculty of Applied Biological Sciences and the Faculty of Engineering are also essential to COMIT's mission of advancing life sciences.

In January 2023, COMIT commenced operations, bolstered by a management reform subsidy from the MEXT. The center is pioneering the development of a research infrastructure and a community-oriented clinical research system. Additionally, the 'Center for Research, Education, and Development for Healthcare Life Design (C-REX),' the 'Center for Integrated Sciences of Low Temperature Plasma Core Research,' and the 'Quantum-Based Frontier Research Hub for Industry Development (Q-BReD)' have all been officially recognized by the government.

As a key initiative in fostering industry-academia collaboration hubs at core regional universities, the Tokai Open Innovation Complex Gifu site (TOIC building) was completed in December 2023. Its inauguration marks a significant acceleration in the enhancement of research capabilities and the promotion of industry-academia partnerships.

Addressing carbon neutrality and changes in both the climate and environment changes is crucial for reaching Sustainable Development Goals (SDGs). We are committed to transforming societal challenges into catalysts for economic growth through the advancement of science, technology, and the stimulation of innovation.

The second aspect I would like to emphasize is educational reform. Through

collaboration with Nagoya University, we have introduced joint classes across all academic disciplines and offer credit-transferable courses in English education, mathematical data science, and AI education. We have also increased our support for doctoral candidates in our graduate programs. Through continuously improving the learning environment at Academic Central - one of the core THERS educational directives - we can now eagerly anticipate the realization of the Digital University Concept that will drive campus digital transformation (DX).

In 2022, Gifu University was selected for MEXT's 'Human Resource Development for Regional Revitalization: Supereminent Program for Activating Regional Collaboration (SPARC).' Since then, multiple universities within Gifu Prefecture have been collaboratively executing the 'Gifu Region Human Resource Development Program, to establish academic infrastructure for regional revitalization (SPARC-GIFU).'

This initiative unites national, public, and private universities in forming a collaborative entity dedicated to developing a unified educational program. It further seeks to strengthen partnerships with regional industries, government bodies, academic institutions, and financial sectors. The goals are to enrich community knowledge and foster the development of mechanisms that rejuvenate the region.

The third pillar of our strategic development is the expansion of our international outreach and engagement. We are committed to fostering international collaboration and exchange, as this is integral to our mission of being a hub university in the region. Operating under the philosophy that 'Global success breeds local vitality,' Gifu University has forged inter-university agreements with 49 institutions and inter-departmental accords with 60 universities worldwide. To expedite our internationalization and enhance our educational and research prowess, we have initiated four international Joint Degree Programs (JDPs) with the Indian Institute of Technology Guwahati (IITG) and the National University of Malaysia (UKM). Looking ahead, we plan to explore the establishment of JDPs with other partners in Europe and Southeast Asia and to devise projects that encourage international exchange across the region, in sync with industry and academia.

We are dedicated to deepening our collaboration with local governments more than ever, and in our commitment to fostering regional co-creation, we will intensify our support for startups emerging from the university. Embracing our new vision and strategies, Gifu University—alongside our students, faculty, staff, and stakeholders—strives to always be 'Gifu University: cherished, accessible, and engaged with our community and the world.'

We aim to persist as a catalyst for societal transformation and reform. Our commitment is unwavering in our journey to evolve as a 'sustainable cornerstone of regional education.'

YOSHIDA Kazuhiro

University Emblem

Designed by Dr. Hanichi Sakai, Professor Emeritus of Gifu University

-Gifu University's emblem signifies a boat traditionally used for cormorant fishing and the fire kindled on it to attract fish. The fire represents learning, while the boat represents human happiness.

-The light and dark splashes the Earth and the natural world. They represent all existence and activity, harmony and balance.

-The combination of black and orange signifies passion. It also represents rich and dignified sensibilities.

-The simplified shape signifies the cleanliness and dynamic character of contemporary life. It also represents the speed and intellectual tenor of our times.

University Symbol

Designed by Mr. Hiromi Miyagawa

In 2009, to mark the 60th anniversary of the University's founding, the University solicited design proposals nationwide and chose this symbol from among the proposals. The design embodies our hope that the rich educational and research activities being carried out in Gifu will be known throughout Japan and to the world, and that the students of Gifu University will advance on a sure path-like an arrow-toward their respective futures. The emblem incorporates a powerful bow, forming the letter G for "Gifu."

Ideals

Blessed with abundant nature and referred to as the land of seiryu (clear water), for historical and geographical reasons, the Gifu region has developed and passed down a diverse culture and technology that brought eastern and western cultures together. Having inherited these attributes, Gifu University, a constituent member of Tokai National Higher Education and Research System (THERS) trains students, who will later actively participate in society. We provide a place where students learn, explore, and contribute in an environment conducive to exploration and growth. Applying the distinguishing feature of having all undergraduate and graduate programs located on a single campus for educational and research activities, Gifu University provides education focused on training highly skilled professionals by fully utilizing a strong partnership with our THERS partner, Nagoya University. We are committed to conducting high quality research that is the foundation of such education and to achieving internationalization rooted in the local community. The University strives to become a core hub for reinvigorating local communities through efforts such as providing local communities with the benefits derived from the above activities.

Aims

1. Education

Gifu University cultivates highly skilled professionals who have deep, extensive knowledge, strong motivations for autonomous learning, high moral standards, and the skills to explore and tackle social issues to build the better future. To fulfill this mission, Gifu University provides students with quality education, the best combination between in-person and remote learning, and visualizes achievements of individual students to motivate their continued academic improvement.

2. Research

Gifu University aims to increase the number of citations of papers authored by our researchers full of intellectual curiosities to enhance our academic competence in the world. The University also aims to form a group of research hubs where the world's best research results are produced, paving the way for finding solutions to a wide range of current socio-economic issues.

3. Internationalization

Gifu University carries out diverse educational activities with the Joint Degree Programs as a driving force for globalization (glocal: global + local), namely "internationalization rooted in local communities." The University also makes the best of THERS' global human network reinforced by information and communication technology (ICT).

4. Social Contribution

Gifu University deepens and strengthens cooperation among different universities, university-affiliated organizations, local businesses, and so on in the central Tokai region to resolve various regional issues. The University also promotes the region's distinctive features and attractions by providing quality education and contributing to better public services for citizens. In addition, the University accelerates educational and research activities conducive to enhancing local businesses' competitive edge, generation of entrepreneurs and business ventures, formation of industry-academia collaboration center, and creation of new sets of values through effective application of technological innovations for the development of society.

5. Regional Medicine

Gifu University Hospital plays a pivotal role in supporting regional medicine, and contributes to the well-being of citizens as the sole university-affiliated hospital in Gifu Prefecture. The Hospital provides citizens the most advanced medical treatments, creates comprehensive medical information platforms, fosters global-minded medical professionals, and spearheads the advancement of regional medicine to meet the needs of society.

Charter of Student : What Gifu University expects of its students

The few years that the students spend at Gifu University will surely be some of the most brilliant years of your life, and therefore arguably the most important. Your student life at Gifu University will play a decisive role in your future, however, you choose to live it. As you build a foundation for scholarly pursuits and acquire advanced and specialized knowledge, we ask that you also strive to develop your capacity for perception and sensitivity towards humanity, nature, and society. The University faculty will do its utmost to meet your expectations, and we ask that you, in turn, put forth your greatest efforts.

- Read books, and strive to build a solid foundation for learning.
- Develop an appreciation for the arts, and aspire to deepen your understanding of humanity and nature.
- Endeavor to acquire the advanced and specialized knowledge needed to be a professional.
- Assemble your thoughts into clear and logical pieces of writing, so that you can present your ideas effectively.
- Enhance proficiency in English, and develop the skills needed for mutual understanding in today's global environment.
- Use information and communication technology prudently, and develop your ability to locate and discern factual information and convey information accurately to others.
- Form healthy living habits, and develop physical stamina and vigor for a long and healthy life.

Charter of Faculty : What Gifu University asks of its faculty

Gifu University makes efforts to embody the ideals of research and education. In accordance with the Charter of Student, the greatest mission with which the University is charged is the cultivation of outstanding talent that will meet the needs of society. We believe that supporting first-rate research and a passion for learning are essential components of high-quality education. To this end, the faculty, as both researchers and educators, must remain conscious at all times of the University's high standard of ethics, while pursuing original research on par with the world's best.

- As faculty members of a center of education and research, teach in a manner that supports the Charter of Student.
- Cultivate competent personnel who possess a depth and breadth of views and the comprehensive skills needed for sound evaluation and judgment.
- As both researchers and educators, let your actions reflect a constant awareness of ethics.
- Hold lofty goals, and aim to conduct research on par with the world's best.
- Pursue original research with a broad perspective and view for the long-term.
- Seek to contribute to society in your field of study.

Charter of Philanthropy : How Gifu University responds to the expectations and needs of society

The image invoked by the word 'university' has traditionally been one of a lofty presence far removed from society, a so-called 'ivory tower.' However, since the move to incorporate national universities in Japan, they have become corporate entities upon which today's society places vast expectations. Universities have responded to these expectations by actively serving and giving back to society. As a regional university situated in the center of Japan, Gifu University is expected to respond to the broad expectations and demands of the regional community in areas of education, research, industry, medicine, culture and others, and contribute to the international community as well.

- Cultivate excellent human resources, as this is the greatest social contribution expected of the University.
- Cooperate and collaborate with the regional community, as this is one of the most important obligations of a regional university.
- Help breathe new life into regional industry through cooperation with industry and government.
- Contribute to the progress of regional education, culture, economy, and public administration through cooperation with the region's citizens and administrative authorities.
- The University Hospital is also expected to carry out its roles as a center of advanced medical treatment and of development of local medical care.
- Work with developing and developed nations for the resolution of international and social issues.
- Contribute to the international community through student exchange programs and other collaborations with overseas educational institutions.

Charter of Administration : What Gifu University requires of its administration

Society has high expectations for the University regarding education, research, and social contributions. In this regard, it is imperative that the University responds to these expectations by setting and achieving the Mid-Term Objectives, and making and implementing the Mid-Term Plan. The University aims to advance its original goals and to see that the University itself progresses as an organization with a unique structure and system of values. To do so, it is crucial that the staff and faculty share a common awareness of the issues concerned and engage in the administrative affairs of the University under the leadership of the President of the University. Given that necessity, it is essential that we focus on strategy and work to build a distinctive university. Given the unforgiving economic conditions that all national universities face, administration and management require the element of strategy in their operations if they hope to maintain the activities of the University and advance the education, research, and social contributions that are its essential responsibilities.

- Achieve the Mid-Term Objectives and execute the Mid-Term Plan.
- Emphasize the importance of strategizing, and carry out administration with clear objectives under the leadership of the University President.
- Conduct operations with a high priority placed on environmental issues. Concerns for these issues should be reflected in the University education, research, and social contributions.
- Operate under a clear management strategy in order to overcome harsh economic conditions.
- Be diligent in the acquisition of external funding and strengthen the University's economic base.
- Emphasize transparency and the public accessibility of information, and conduct management in a manner that is both efficient and logical.
- Hire first-rate people for the faculty and cultivate their talents.
- Use the University assets such as student educational data and educational research data of faculty for the promotion of quality education and research work.

■ Three Policies for Education (for Undergraduate)

Diploma Policy	<p>Blessed with the unique feature of having all faculties clustered within one campus, Gifu University promotes education focusing on nurturing highly-skilled professionals, outstanding research for high level education, and internationalization rooted in the local community. Under the motto of "Learning, Exploring and Contributing," the university awards bachelor's degrees to those who have comprehensively acquired the underlying principles and specialized skills in their respective fields of expertise.</p> <ul style="list-style-type: none"> • Fundamental abilities that cultivate humanity: <ul style="list-style-type: none"> - Ability to think (comprehensive judgment) - Ability to communicate (communication skills) - Ability to carry things forward (action-taking skills) • A high degree of specialization required of professionals: <ul style="list-style-type: none"> - Sophisticated expertise and skills that are required to further the development of society - Ways of thinking and viewpoints based on extensive knowledge and insight - A sense of social responsibility based on a broad liberal arts education and a high standard of ethics
Curriculum Policy	<p>Gifu University organizes and implements its systematic education curriculum with clear goals, and carries out constant reforms based on the following curriculum policy so that it may produce professionals equipped with fundamental abilities as well as specialized skills.</p> <ul style="list-style-type: none"> • Develop fundamental abilities that cultivate humanity • Properly appraise own academic achievements and cultivate a mindset of autonomous studying • Implement liberal arts education ranging from humanities, social sciences, natural sciences, Gifu studies, sports, health sciences, English / foreign languages and culture, practical skill sets for working adults, mathematics and data science, and artificial intelligence (AI) for students to assess their own academic achievements and to study proactively towards life-long learning • Train students to have professional viewpoints and ways of thinking reflecting their respective fields of expertise • Cultivate ethical standards that enable students to act in a socially responsible manner
Admission Policy	<p>With the campus situated in a natural lush green environment, Gifu University seeks to foster individuals who are able to "learn, explore and contribute" in a wide range of academic pursuits. Gifu University seeks to admit students who possess the following qualities, on top of basic knowledge and expertise:</p> <ul style="list-style-type: none"> • Those who have intellectual curiosity and are self-motivated to learn and study • Those who see things from multiple perspectives and capable of logical thinking • Those who listen to opinions of others and express their ideas • Those who are motivated to actively inquire about the issues before them • Those who will play active roles locally and globally <p>To select students who are equipped with the aforementioned qualities, and in line with own diploma and curriculum policies, the respective faculties conduct an entrance examination from multiple and comprehensive perspectives to evaluate students through their academic achievement and essay tests. Please refer to the student recruitment guidelines of each faculty.</p>

■ Three Policies for Education (for Graduate)

Diploma Policy	<p>Blessed with the unique feature of having all faculties clustered within one campus, Gifu University Graduate School promotes education focusing on nurturing highly-skilled professionals, outstanding research for high level education, and internationalization rooted in the local community. Under the motto of "Learning, Exploring and Contributing," the university awards degrees to those who have comprehensively acquired the underlying principles and specialized skills in their respective fields of expertise.</p> <ul style="list-style-type: none"> • Fundamental abilities as highly-skilled professionals: <ul style="list-style-type: none"> - Ability to think (comprehensive judgment) - Ability to communicate (communication skills) - Ability to carry things forward (action-taking skills) • Advanced specialized knowledge and technical skills: <ul style="list-style-type: none"> - More sophisticated expertise and skills that are required to further the development of society - Ways of thinking and viewpoints based on more extensive knowledge and insight - A sense of social responsibility based on a broader liberal arts education and a higher standard of ethics
Curriculum Policy	<p>Gifu University Graduate School organizes and implements its systematic education curriculum with clear goals, and carries out constant reforms based on the following curriculum policy so that it may produce professionals equipped with fundamental abilities as well as specialized skills</p> <ul style="list-style-type: none"> • Cultivate sophisticated expertise and skills that are required to further the development of society • Develop ways of thinking and viewpoints based on extensive knowledge and insight • Cultivate a sense of social responsibility based on a broad liberal arts education and a high standard of ethics
Admission Policy	<p>With the campus situated in a natural lush green environment, Gifu University Graduate School seeks to foster individuals who are able to "learn, explore and contribute" in a wide range of academic pursuits. Gifu University Graduate School seeks to admit students who possess the following qualities, on top of basic knowledge and expertise:</p> <ul style="list-style-type: none"> • Those who have intellectual curiosity and are self-motivated to conduct research • Those who can contemplate things comprehensively and logically • Those who have a broad range of knowledge and high standard of ethics, and who acknowledge social responsibility in their research • Those who will play active roles locally and globally <p>To select students who are equipped with the aforementioned qualities, and in line with own diploma and curriculum policies, the respective graduate schools conduct an entrance examination from multiple and comprehensive perspectives to evaluate students through their academic achievement and essay tests. Please refer to the student recruitment guidelines of each faculty.</p>

On November 27, 2009, Gifu University declared itself an “environmental university,” indicating that it would contribute to the regional community by pursuing ongoing, unique programs of environmental initiatives based on the Gifu University Environmental Policy.

[Gifu University Environmental Policy]

Gifu University continues and expands activities for “environmental university” while aiming for achieving its ideals and aims. The University also makes campus friendly to the environment and develops human resources who will initiate environmental conservation for the future.

[Basic Policies]

1. Pursue environmental education and research in a way that takes advantage of the University's unique characteristics.
2. Be aware of the environmental aspect of educational and research activities at all times, evaluate the environmental impact of the University's activities, and strive to prevent environmental pollution.
3. Work to significantly lower the environmental impact of the University's activities by saving energy and resources.
4. Thoroughly comply with environmental laws and regulations applicable to education and research as well as with other provisions and requirements to which the University has acceded.
5. Establish and work to continuously improve a framework for reviewing the University's environmental management system.
6. Mitigate the problems of climate change, adaptation, and protect biodiversity through education and research.
7. Establish and work to achieve activity targets and objectives for each academic year.

Gifu University publicizes this Environmental Policy both on and off campus.

Gifu University has earned university-wide ISO 14001 certification (excluding the University Hospital)

After the Faculty of Regional Studies earned certification under ISO 14001, a global environmental management system standard, in 2003, the scope of certification was successively expanded, and the entire university had earned it by 2013, with the exception of the University Hospital.

The university earned certification under ISO14001:2015, the new standard of ISO14001 in 2016 and its environmental management is monitored by this new standard.

Gifu University publishes an Environment White Paper.

Gifu University publishes an Environment White Paper in September every year to make Gifu University's efforts for environment conservation public.

Lab interview by student editors

Gifu University Environment Month (every November)

Gifu University has designated November as Environment Month, a time during which a variety of environment-related events are carried out, based on the date of its Environmental University declaration (November 27, 2009).

Campus cleanup by students and faculty members

University Library

■ Archive Core

Archive Core was established in the University Library in commemoration of Gifu University's 70th Anniversary in June 2019. It comprises two exhibition spaces: "PRAETER" and "FUTURUM."

Materials in Storage

Faculty of Education	World's oldest printed scripture, "Hyakuman-to (Million Tower), body Armor of the Ogawa Family
Faculty of Applied Biological Sciences	Silkworm anatomy model, illustration of paddy insect pest
Faculty of Engineering	Plasma chemical vapor deposition (CVD), flexible solar battery
School of Medicine, University Hospital	Anatomical drawing by Toshio Tange, Japanese painting by Tadashi Moriya
Faculty of Regional Studies	Local government records/references, local history documents (stored by the Center for Local Archives)

Note: In addition to the above items, Archive Core houses archeological papers (over 90,000), artworks (approx. 60 pictures, paintings, etc.), stuffed animals, samples of eggs (approx. 1,100) and anatomical drawings (approx. 534).

Stuffed animals displayed at PRAETER

■ University Hospital

As the sole university hospital and only advanced treatment hospital within Gifu Prefecture, the University Hospital provides highly advanced medical care. The Hospital places particular emphasis on advanced treatments for five major disease categories: cancer, cardiac infarction, stroke, diabetes, and mental health disorders. Additionally, the Hospital prioritizes six critical medical services: emergency response, disaster medicine, rural and community healthcare, perinatal care, pediatrics, and treatment for emerging infectious diseases, all of which are considered high-priority areas by the Japanese government. Recognized as a leading hospital for cancer care in the prefecture and an advanced emergency medical service center, the Hospital specializes in managing complex conditions such as hepatitis, HIV/AIDS, perinatal complications, disaster and nuclear emergency-related illnesses, allergies, cardiovascular diseases, and cerebral apoplexy.

In January 2019, the Gifu Medical Regional Consortium was formed to facilitate collaboration among medical institutions within and beyond the University Hospital. This initiative aims to advance medical treatments in Gifu Prefecture and foster cross-department team medicine at the Hospital. The Hospital has expanded its services with newly added divisions and departments: - the Division of Infection Control, the Quality Management Division, the Department of Comprehensive Clinical Training, and the Training and Career Development Support Center for Medical Staff. These additions commenced operations in April 2022. Furthermore, operation of the Center for Patient Flow Management started in January 2023, followed by the Center for Robot-Assisted Surgery in April 2024. All of them are strongly committed to providing top-tier medical care to all residents of Gifu.

The Hospital's ultimate goals are to create and implement a "Smart Hospital" that offers the best personalized medical treatments in the post-COVID world, meeting the increasing demands for enhanced public healthcare. Prioritizing the safety and security of individuals and society, the University Hospital remains committed to medical safety, acceleration of clinical research, fostering global human resource development, and providing advanced, high-quality medical treatments as the region's sole special functioning hospital.

Quality Management Division	Clinical Ethics Division
Department of Comprehensive Clinical Training	"Sawayaka" Quality Service Promotion Division

■ Animal Medical Center

The Animal Medical Center is the only facility dedicated to veterinary education, research, and treatment in the Chubu region. In response to the increasing need for veterinary practices in recent years and to provide advanced medical treatment that pet owners expect, a new clinical ward and multipurpose building (former Linac Center) were built onto the Animal Medical Center in April 2010 as well as the MRI-CT Ward in April 2012. The Center's new clinical ward has private consultation rooms, a positive pressure surgery room which can also be used for brain surgery, and an intensive-care unit. It is an advanced facility equipped with electronic medical charts and diagnostic imaging units. The Linac Center was the first of its kind at a Japanese national university to have a high-energy radiation LINAC (linear accelerator) treatment system, and the MRI Ward was likewise the first to have an MRI (magnetic resonance imaging) system. In addition, the Center started to operate the high precision radioactive treatment equipment in July 2023.

One of the special features of the Center is the operation of multiple departments to treat both companion and farm animals. The department of internal medicine, surgery, oncology, anesthesiology, neurology, and orthopedic surgery for companion animals in particular is receiving about 10,200 cases of referrals annually from private hospitals in the Tokai, Kinki and Hokuriku regions in Japan. On the other hand, the departments treating farm animals are playing an important role in the medical care of farm animals in Gifu area.

Ward and Room

As of April 1, 2024

Name	Floor Space(m ²)	Facility Information
Clinical Ward	912	1 st floor: 7 Consultation Rooms, Ultrasonography Room, Treatment Room, Examination Room 1, Pharmacist, Reception and Office 2 nd floor: Positive Pressure Surgery Room, General Operating Room (3 operating tables), Operation Preparation Room, Intensive-Care Unit, Recovery Room, 2 Nap Rooms
Multipurpose Building, MRI-CT Building	341	Linac Room, MRI Room, Control Room
Clinical Ward (1st floor)	438	Endoscope & Laparoscope Room, Dental Room, X-ray and Image Analysis Room, Examination Room 2, Director's Room/Counseling Room, Administrative Office
CT Ward	47	X-ray CT Imaging Room, Control Room
Animal Management & Care Ward	260	Inpatients Rooms for Sick Animals, Animal Blood Donation Room, Medical Office
Linac Building	400	High Precision Radioactive Treatment Room, Resting Room, Dog Accommodation Unit
Total	2,398

Changes in the Total Number of Clinical Visits to the Department of Internal Medicine, Surgery/Neurology/Anesthesia/Orthopedics and Oncology

■ Collaboration Center for Medical Education

Medical Education Development Center (MEDC)

The Medical Education Development Center (MEDC) was established in 2001 as a collaboration center for medical education to promote the development of human resources who can contribute to medical education and collaborative and joint research with medical education institutions both in Japan and overseas. Initially accredited in April 2010, MEDC is the only collaboration center for medical education accredited by the Ministry of Education, Culture, Sports, Science, and Technology. MEDC was re-accredited for another five years in April 2020. Among many other things, MEDC conducts a Medical Education Seminar and Workshop three times a year, which has won high praise as a nation-wide program for Faculty Development. MEDC also launched a program to nurture leaders in the health professions education. MEDC Fellows/ Associates Certificates are awarded to those who have completed this course.

The Educational Development and Improvement Division of MEDC in particular focuses on developing medical education and proper skill assessments for health professionals. In addition, the Teacher Development Division supports career-building and secures provision of quality education for medical leaders.

MEDC makes continued efforts for improvement of professionalism, outcome-based medical, and computer-supported education, portfolio assessment systems, international exchanges, medical English education, Master of Health Professions Education, and doctoral programs in medical education.

Clinical Skills Education

■ Center for Collaborative Study with Community

As a "core for regional revitalization," the Center for Collaborative Study with Community seeks to be a region-based university. The Center's priority agendas to work for the benefits of local communities are as follows:

- Fostering next-generation regional leaders who are well-versed in community affairs, capable of finding and contributing to solutions of regional issues ("Next-Generation Regional Leader Fostering Program")
- Promotion of research to resolve regional problems (region-oriented research program), and
- Creation of a "place for dialogue and co-creation" for Gifu University and local citizens to talk and discuss possible solutions to regional issues, and co-create new value ("Gifu Future Center").

In addition, the Center has established the Gifu Center for collaborative activities between communities and schools (GIFU CCCS) jointly with Gifu Prefecture to foster coordinators or "social education supervisors", and implements senior high school and university cooperation projects together with Gifu Prefecture and Gifu Prefectural Board of Education,

In order to promote these activities, we have built the relationship of municipal governments, educational organizations, communities, financial institutions, civic organizations, and so on, and serves as a liaison among them.

■ Health Administration Center

The Health Administration Center assumes its main role in the health promotion and development of university students and faculties/staff based on the School Health and Safety Act and the Industrial Safety and Health Act.

The Center provides annual health checkups and health counseling/support for all students and faculties/staff. The Center also provides first aid services, health advice/education, health enlightenment activities, and so on. Furthermore, the Center implements campus health plans and offers a wide range of services, among which personalized mental healthcare for students, support for students with special needs, and promotion of well-being of international students are high on the Center's agenda.

The Center conducts epidemiological analysis relating to students and faculties/staff health issues, which has contributed to significant health policy development on Gifu University campus as well as other universities in Gifu Prefecture.

■ Tokai Open Innovation Complex Gifu Site

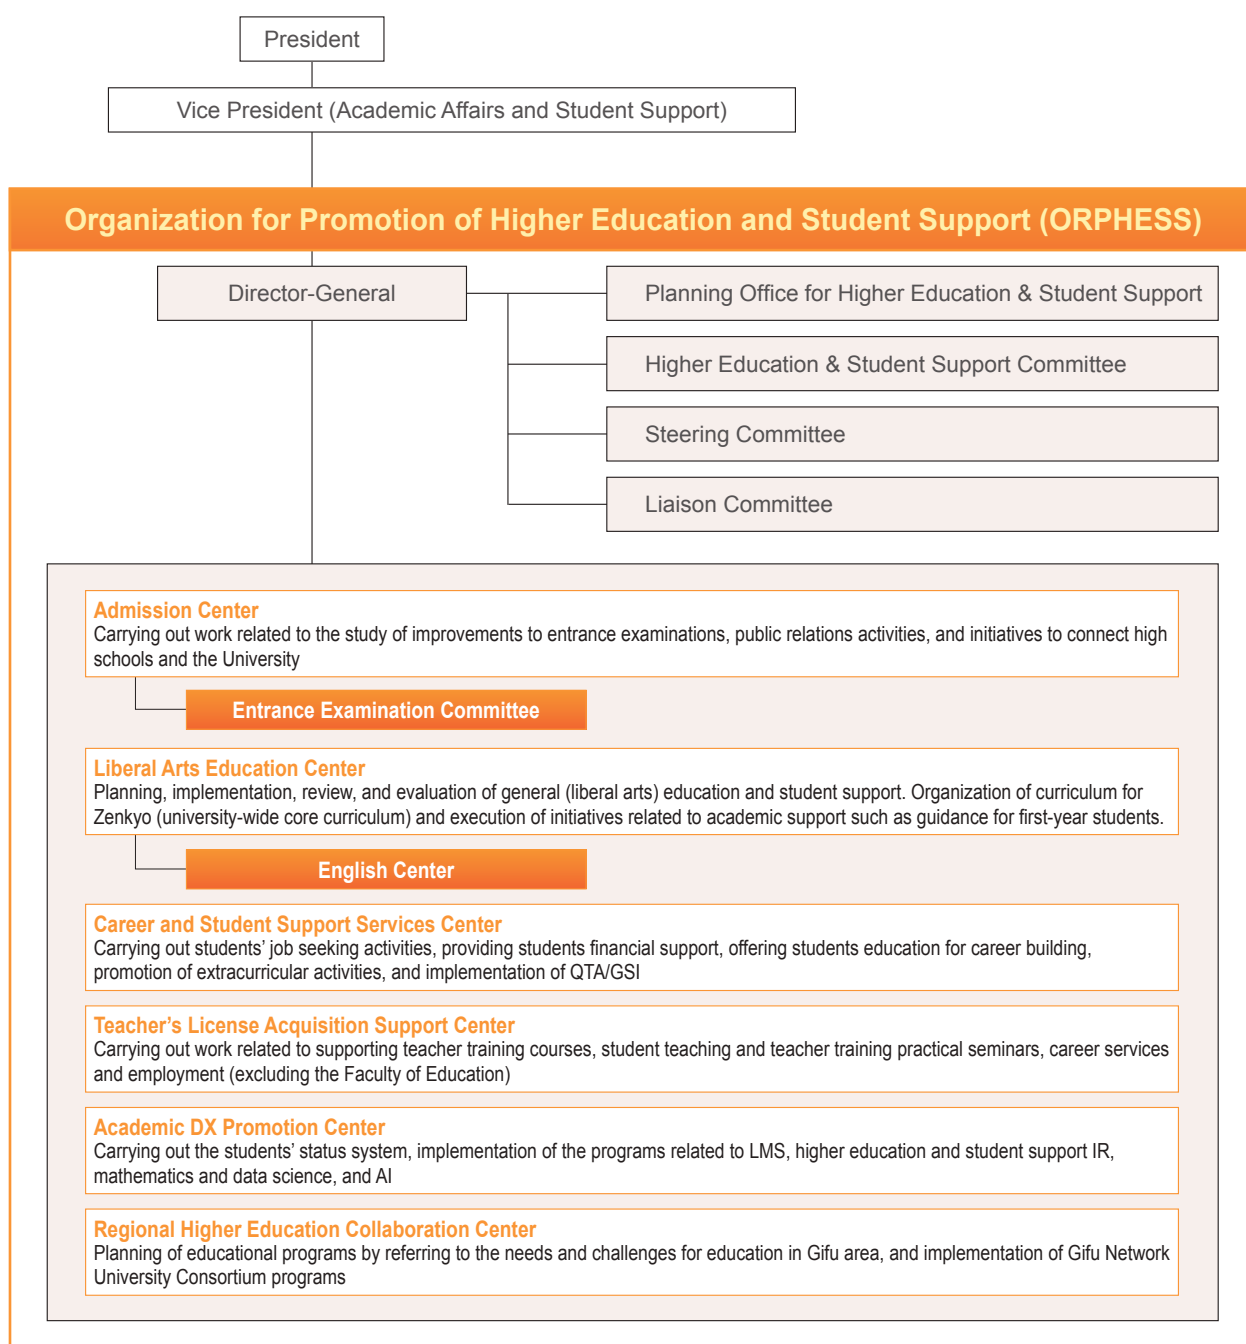

The Tokai Open Innovation Complex Gifu Site (also known as OKB Gifu University Plaza) was inaugurated in 2023. It fulfills three pivotal roles: 1) a nexus for corporate activities, fostering joint research and partnerships, 2) a foundational base for nurturing startup ventures, and 3) a conduit for industry-academia collaboration, catalyzing the generation of new open innovations.

Working in tandem with the Tokai Open Innovation Complex Nagoya Site at Nagoya University and sharing analogous functions - the Gifu Site aids joint research initiatives, and facilitates university-originated startups, particularly in the realms of advanced materials, carbon neutrality, and digital transformation. Moreover, it acts as a crucible for novel innovation, spurred by dynamic exchanges and synergies among a broad spectrum of stakeholders, encompassing local enterprises, financial entities, academic circles, and governmental bodies."

Student Club Activity

Gifu University Student Clubs / Circles

As of May 1, 2024

Organizing Committee (3)

- ◆ Gifu University Festival Committee
- ◆ Gifu University Spring Festival Committee
- ◆ Gifu University Career Fair Committee

Culture, Arts and Science Clubs (32)

- ◆ Hiromu (Acoustic Guitar Circle)
- ◆ Tea Ceremony
- ◆ Dream Box (Student Humane Society)
- ◆ Students Volunteer Safety and Fire Corps
- ◆ Radi Sta (Broadcasting)
- ◆ G-amet
- ◆ Orchestra
- ◆ Guitar & Mandolin
- ◆ Competitive *Karuta* (Japanese Card Game)
- ◆ Popular Music
- ◆ Chorus
- ◆ GI
- ◆ Coroppo (Puppet Play for Children)
- ◆ Jugggrass(Juggling Circle)
- ◆ Photography
- ◆ Brass Band
- ◆ Biological Science
- ◆ Cat Circle
- ◆ Tsukinowaguma (Asiatic Black Bear) Study
- ◆ Table Game Circle
- ◆ Zoo Club
- ◆ Art
- ◆ Student Folk Song Music Band
- ◆ Writing Fairy Tales
- ◆ Japanese Music
- ◆ Star Watching
- ◆ Manga
- ◆ UNESCO
- ◆ Rakugo Comic Storytelling
- ◆ Ryugaku Love (International Exchange)
- ◆ Three trees (Greening)
- ◆ Robocon (Robot Contest)

Sports Clubs (34)

- ◆ Aikido
- ◆ American Football
- ◆ Iaido (Art of Weaponless Self-defense)
- ◆ Karate
- ◆ Kyudo (Japanese Archery)
- ◆ Kendo (Swordsmanship)
- ◆ Glider
- ◆ Tennis
- ◆ Baseball (Hardball)
- ◆ Soccer
- ◆ Mountain Climbing
- ◆ Automobile
- ◆ Judo
- ◆ Baseball (Semi-Hardball)
- ◆ Shorinji Kempo Martial Arts
- ◆ Swimming
- ◆ MEC Stars (Street Dance)
- ◆ Soft Tennis
- ◆ Gymnastics
- ◆ Table Tennis
- ◆ Stars (Cheerleading)
- ◆ Tae Kwon Do
- ◆ Equestrian
- ◆ Basketball
- ◆ Badminton
- ◆ Volleyball
- ◆ Handball
- ◆ Formula Racing
- ◆ Canoe
- ◆ Yosakoi Dance Circle
- ◆ Lacrosse
- ◆ Rugby
- ◆ Track & Field
- ◆ Wander Vogel

Sports Clubs for Medical Students (18)

- ◆ Swimming
- ◆ Basketball
- ◆ Tennis
- ◆ Soccer
- ◆ Track & Field
- ◆ Skiing
- ◆ Boat
- ◆ Handball
- ◆ Baseball (Semi-Hardball)
- ◆ Soft Tennis
- ◆ Golf
- ◆ Rugby
- ◆ Equestrian
- ◆ Badminton
- ◆ Kyudo (Japanese Archery)
- ◆ Kendo (Swordsmanship)
- ◆ Volleyball
- ◆ Table Tennis

Culture, Arts and Science Clubs for Medical Students (12)

- ◆ GEMs (Gifu Emergency Medical Study)
- ◆ Okuhotaka Medical Club
- ◆ Gifu Medical Care
- ◆ Koto Music
- ◆ Liebe Parze (Jazz)
- ◆ Art
- ◆ Castanuela (Band)
- ◆ Kirin no Kai (Study Group of Clinical Skill)
- ◆ GIFMSA (Gifu International Federation of Medical Students' Association)
- ◆ Piano
- ◆ Chamber Orchestra
- ◆ Outdoor

Besides the listed above, there are 49 other clubs.

'Outdoor Live Show in Autumn' submitted for the First Gifu University Photo & Art Competition

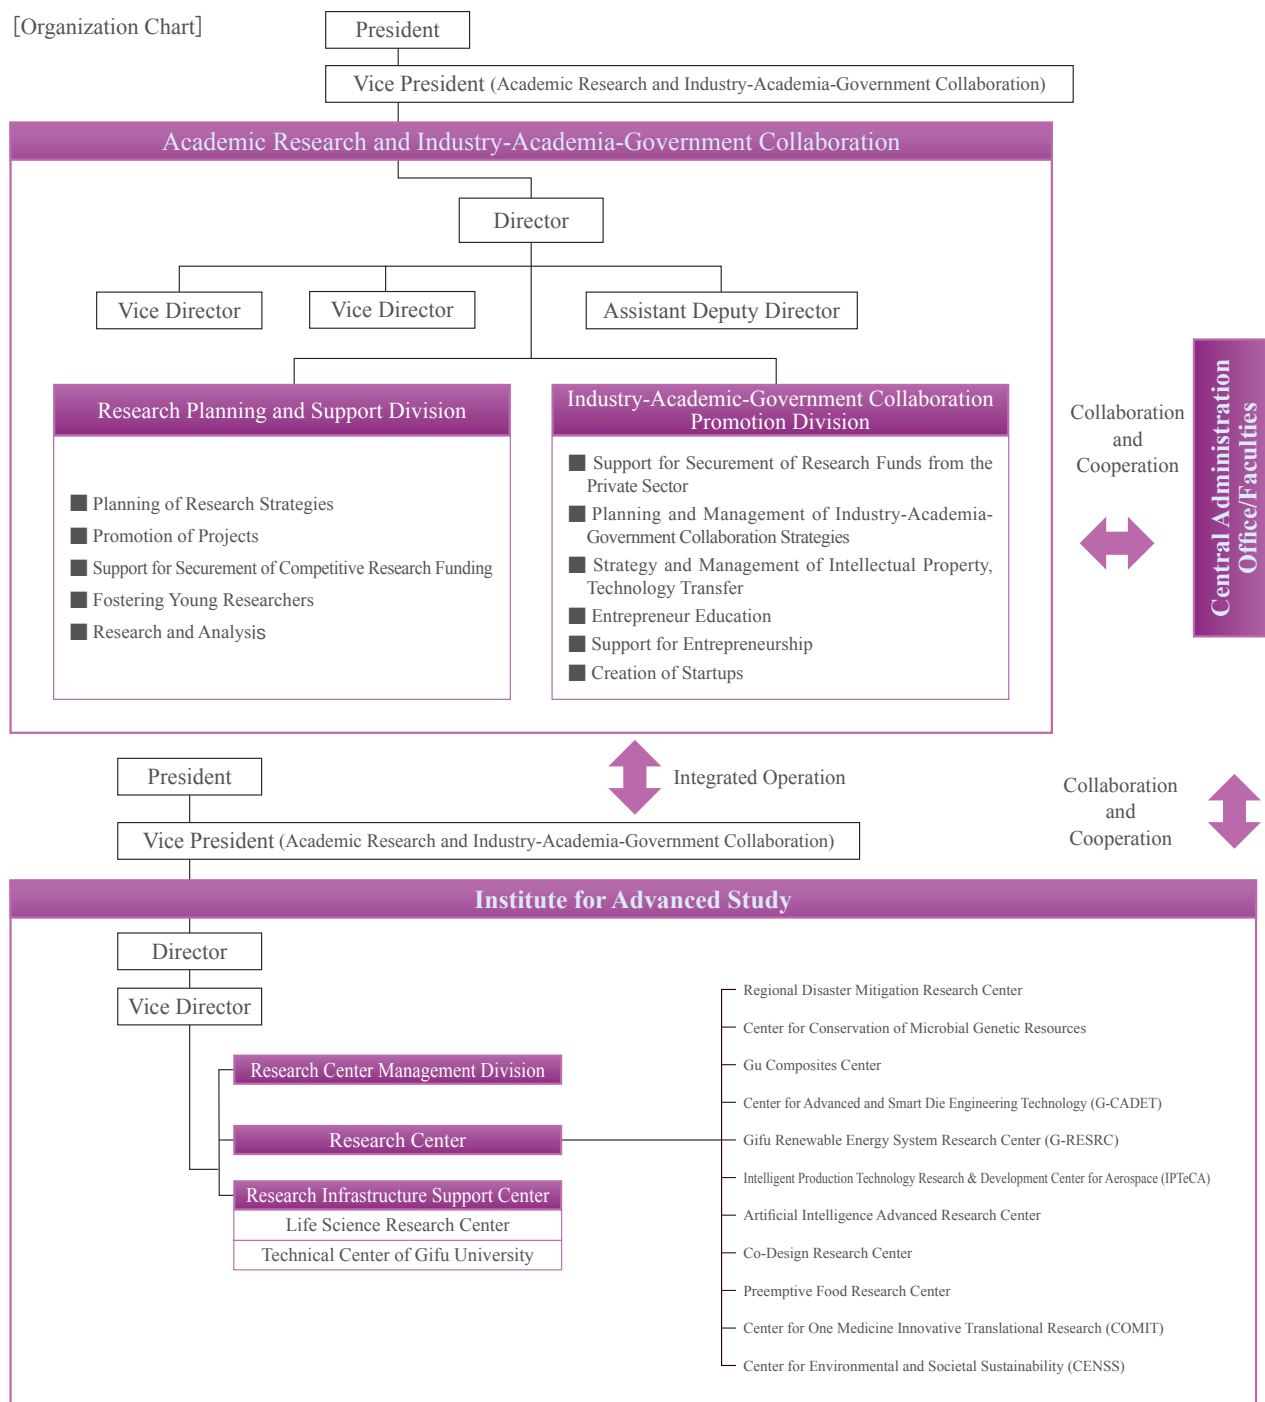

'Practice on Campus' submitted for the First Gifu University Photo & Art Competition

Research

■ Academic Research and Industry-Academia-Government Collaboration ■ Institute for Advanced Study

[Organization Chart]

■ Research Hub Collaboration Support Project

Gifu University and Nagoya University are capitalizing on their distinctive attributes and collaborative efforts to maximize the synergistic effect. Our goal is to establish themselves as a premier hub on both a national and global scale. This hub gains recognition and support from the Tokai National Higher Education and Research System, serving as a foundation for competing globally and a top-tier research base in specialized fields, and significantly contribute to T-PRACTISS.

*T-PRACTISS: a model that fosters a dynamic cycle of value creation throughout the central Tokai region, emanating from a university consortium centered around the Tokai National Higher Education and Research System.

T-PRACTISS : T = THERS (Tokai National Higher Education and Research System)

PRACTISS = Project to Renovate Area Chubu into Tech Innovation Smart Society

Institute for Glyco-core Research (iGCORE)

Glycans form the third essential life chain, indispensable for biological activity. The Institute for Glyco-core Research (iGCORE) is a world-class, integrated glycoscience research institute dedicated to deciphering the structure and function of glycans.

The iGCORE stands as a unique, integrated glycoscience institute in the world. It brings together top-level researchers in the fields of glyco-chemistry and glycan imaging from Gifu University, along with experts in glycobiology and glyco-medical science from Nagoya University. We have united our efforts to comprehensively study glycans, the third life chain, following nucleic acids and proteins. The iGCORE's major mission is to elucidate new principles of life and advance basic research that paves the way for medical breakthroughs, including the prevention and early detection of diseases before an individual's symptoms appear. To achieve these goals, iGCORE harnesses the collective research capabilities within THERS and demonstrates global leadership under an international research strategy.

Aerospace Research and Education Hub (AREH)

The Aerospace Research and Education Hub (AREH) is the nation's pioneer in providing scientific and systematic education, research, and development in aerospace design and production technologies.

At the Aerospace Research and Education Hub (AREH), we are actively addressing the rapid technological evolution and societal demands. In collaboration with aerospace-related companies, we have established an integrated human resource development program. This program is designed to cultivate 'design engineers' who are versed in production technology and 'production engineers' who are knowledgeable about design technology. Moreover, by utilizing research findings across diverse fields such as mobility, electrification, and new materials, AREH is at the forefront of academic research and application of new aerospace technologies. One of our efforts are directed towards creating the aerospace vehicles of the next generation. In addition, aiming to significantly increase the aerospace industry's productivity, our researchers from academia and industry are spearheading research and development projects to realize a 'cyber-physical factory' initiatives that integrate informatics and engineering, thereby driving technological advancement and addressing global social challenges.

Center for Research, Education, and Development for Healthcare Life Design (C-REX)

Through the creation of reliable health and medical information and the implementation of data-driven initiatives, the Center for Research, Education, and Development for Healthcare Life Design (C-REX) strives to contribute to the establishment of a well-being-focused healthcare society. Its mission aligns with achieving the Sustainable Development Goals (SDGs) and realizing the vision of Society 5.0.

The Center for Research, Education, and Development for Healthcare Life Design (C-REX) is dedicated to promoting practices informed by data analysis and establishing a system to address health and medical-related social issues. Moreover, C-REX aims to foster a society that prioritizes well-being in health and medicine by implementing data-driven business practices, thereby achieving the Sustainable Development Goals (SDGs) and realizing 'Society 5.0.'

At C-REX, our commitment is to build a robust health and medical database. By conducting comprehensive research and education focused on the threefold concept of 'life' – encompassing existence, livelihood, and life's purpose - we tackle societal challenges and make a meaningful impact on individuals and the broader community.

Center for Integrated Sciences of Low Temperature Plasma Core Research

Low Temperature Plasma technologies are the essential lifeline of manufacturing "Monozukuri" in Japan. The Center for integrated sciences of low temperature plasma core research promotes joint use and joint research and conducts world-leading interdisciplinary research that will lead to innovations.

This center integrates expertise of Center for Applied Research of Plasma (c-ARP) at Gifu University and Center for Low-Temperature Plasma Sciences (cLPS) at Nagoya University. Our mission is to promote the Center's extensive and collaborative use by researchers and joint research with researchers from Japan and across the globe. Our goal is to create new values by pursuing groundbreaking innovations to achieve carbon neutrality and solve global food challenges. We strive to pioneer novel applications in low-temperature plasma and fuse various academic disciplines transcend traditional boundaries.

Center for One Medicine Innovative Translational Research (COMIT)

The Center for One Medicine Innovative Translational Research (COMIT) serves as a platform for researchers who collaborate across fields and facilities in Japan and overseas to develop promising drug discovery seeds for human and animals based on the concept of One Medicine.

The perspective of interconnectedness of human and animal diseases, One Medicine, can rejuvenate development of drug discovery seeds based on structural biology, cell/regenerative medicine, multi-omics analysis and informatics by generating disease model animals based on comparative medicine and develop promising drug discovery seeds.

Our center will promote drug discovery research based on the concept of One Medicine to radically improve the success rate in drug development and cultivate a new academic field.

Quantum-Based Frontier Research Hub for Industry Development (Q-BReD)

The Quantum-Based Frontier Research Hub for Industry Development (Q-BReD) aims to transform the fields of chemistry, electronic materials, electronic devices, and medical diagnostics and treatments. This transformation is driven by quantum technology, distinguished by a unique 'chemical perspective.' The ultimate goal of Q-BReD is the social implementation of quantum technology.

At Q-BReD, we focus on harnessing quantum technology for industrial applications, including the medical sector. Q-BReD stands at the vanguard of medical innovation with the development of next-generation MRI technology, known as 'hyperpolarized MRI,' pioneered by Gifu University. Additionally, it integrates quantum technology into broader society by incorporating Nagoya University's expertise in chemistry. Through a synergistic partnership, the two universities will merge their independently conducted research at Q-BReD, which controls quantum states at the atomic and molecular levels and expedites the industrialization of quantum research, spurs new scientific discoveries, and catalyzes the generation of novel industries.

■ Research Initiatives

Research Institute

Institute for Glyco-core Research (iGCORE) (Established in January 2021)

As Japan's foremost and largest integrative glycoscience research institute, the Institute for Glyco-core Research (iGCORE) was jointly established with Nagoya University in January 2021. By accelerating interdisciplinary research on glycans, a group of eminent researchers in glycoscience (the integration of chemistry, biochemistry, biophysics, analytical chemistry, and mathematical science) is seeking to comprehend the true nature of biological processes. iGCORE aspires to unravel the "core," of the essence of life by engaging multiscale research projects ranging from the level of molecules to individual organisms. The "Human Glycome Atlas Project (HGA)" which is jointly implemented with the National Institutes of Natural Sciences and Soka University, has been strongly promoted since 2023 as the first MEXT-approved "Projects to Promote Large Scientific Frontiers" in the field of life sciences. In 2022, MEXT designated J-GlycoNet, wherein iGCORE serves as the host institute, as a Joint Usage/ Research Center for facilitation of interdisciplinary research at home and abroad.

Research Centers

Regional Disaster Mitigation Research Center (Established in April 2015)

As a knowledge hub of special expertise and a think tank regarding natural disaster science in Gifu University, the Regional Disaster Mitigation Research Center plays an important role in enhancing regional disaster prevention and mitigation. Its major objectives are to improve disaster preparedness and response, and thereby to meet the regional needs for risk reduction. Specifically, the Center promotes academic and practical research on disaster prevention/mitigation and proposes new frameworks/schemes to enhance disaster mitigation capabilities and resilience in local communities. In addition, the Center supports policymaking of local governments, provides technological support, and problem-solving assistance for local communities in terms of planning and implementation of disaster prevention/mitigation measures.

[Division] Division of Technology Development for Disaster Mitigation, Division of Disaster Medicine, Division of Social Development for Disaster Mitigation

Center for Conservation of Microbial Genetic Resources (Established in April 2016)

As one of the most significant conservation centers for pathogenic microbial organisms in Japan, the Center for Conservation of Microbial Genetic Resources maintains an exhaustive collection of microbial resources, and also acquires valued deposits of microbial strains. In addition to maintaining and storing microbial cultures, we provide microbial cultures and DNA for research and industrial applications. Through our facility, we pursue to meet the needs of society and promote the utilization of beneficial microbial resources for industrial use.

[Assignments] Collection, Preservation and Distribution of Pathogenic Microbial Strains

Gu Composites Center (Established in April 2018)

As a material engineering and manufacturing research center, Gu Composites Center carries out a great variety of composite material research programs and projects, ranging from molecular aggregates to fiber and resin composites. The Center has established a pioneering, unique research organization that integrates material chemistry, biochemistry, mechanical engineering, and even medicine, to achieve production process of diversified products in small quantities through the concept of "Tailored Materials & Design." It enables the Center to develop lightweight parts for aircraft and automobiles as well as composite materials used in medical applications in the human body. As one of the three major composite material centers in Japan's Tokai Hokuriku region, the Center actively pursues collaboration with local industry and businesses to aid in their expansion into the world market.

[Division] Division of Barrier-Free Materials, Division of Composites for Human, Division of Environmental Technology of Composites

Center for Advanced and Smart Die Engineering Technology (G-CADET) (Established in April 2018)

The Center for Advanced and Smart Die Engineering Technology is working to enhance the international competitive edge of Japanese manufacturing businesses in a range of industries by 1) further reinforcing Gifu University's already formidable research strengths in the fields of product engineering and manufacturing via AI and IoT, 2) the development of production technologies and highly-reliable design techniques as exemplified by, for example, smart die processing, 3) the development of 3D additive manufacturing, and 4) human resource development.

[Division] Data Analysis Research Division, Materials Processing Research Division, Design Technology Research Division, Additive Manufacturing Research Division, Human Resource Development Division, Regional Collaboration Division

Gifu Renewable Energy System Research Center (G-RESRC) (Established in April 2018)

With the latest technologies to "create," "store," "transport," and "use" CO₂-emission free energy from renewable energy as a strong base, the Gifu Renewable Energy System Research Center introduces the "Local Production for Local Consumption Energy Systems (Regional Revitalization Model)" for practical applications in society in a collaborative effort involving industries, government, and academia. For the realization of the "Regional Revitalization Model," the Center seeks breakthroughs of individual innovations posed by efficient renewable energy use, carbon recycling, establishment of virtual grid energy system with EVs, and an autonomous decentralized energy management system to build carbon neutral energy systems.

[Field] Energy Creation Field, Energy Carriers and Storage Field, Innovation Energy Venture Creation Field, Energy System Integration Field

Intelligent Production Technology Research & Development Center for Aerospace (IPTeCA) (Established in April 2019)

The Intelligent Production Technology Research & Development Center for Aerospace promotes "Accumulation and Establishment of Knowledge and Human Resource in the Region with the Intelligent Production Technology Research & Development Center for Aerospace as a Core" and carries out innovative research and development projects for the advancement of production system architect and cutting-edge production technologies.

Artificial Intelligence Advanced Research Center (Established in April 2019)

The Artificial Intelligence Advanced Research Center aims to promote many promising technologies today such as AI, IoT and data sciences across the campus. As a cross-sectional research liaison office, the center strives to initiate applied research on AI and augment scientific advantages Gifu University currently possesses. The center provides comprehensive AI study sessions and research meetings to the teaching staff and students of every faculty and school in an effort to build an infrastructure enabling researchers to apply AI to their respective academic activities. To meet the needs of local businesses, supporting joint research activities with local industries, becoming a supply base for advanced technology and a source for AI professionals are also among the center's major objectives.

[Division] Education Division, Research Division, Joint Research Promotion Division

Co-Design Research Center (Established in April 2020)

As a community-building thinktank, the Co-Design Research Center's overall mission is the creation of value-added contributions to community where people can enjoy wholesome, fulfilling lives. To this end, the Center's goal is the pursuit of a vibrant and sustainable society through industry-academia-government collaboration and its interdisciplinary approaches. With using design-driven approach that creates experience value and data-driven approaches, we co-create comprehensive planning and policies for example city planning, comprehensive disaster prevention, landscape design, history of urban formation, resource utilization, needs assessment, product development, economic effect measurement, consciousness structure analysis, human resource development and educational effect analysis. And we conduct design research together starting with the extraction of needs aiming to the achievement of objectives and verification of effects.

[Field] Human Resources Design Field, Community Design Field, Value Design Field

Preemptive Food Research Center (Established in April 2022)

Preemptive Food Research Center primarily focuses on extending people's healthy life by researching healthy "meals" that may prevent life-induced diseases, growing number of frail older people, and people with dementia. The Center drafts and implements the "gastronomy manifest" and envisions an "ideal diet" to secure healthy meals for everyone.

[Division] Division of Future Food Research, Division of Cohort Studies and Clinical Trials, Division of Preemptive Food Research

Center for One Medicine Innovative Translational Research (COMIT) (Established in January 2023)

The Center for One-Medicine Innovative Translational Research (COMIT) serves as a platform for researchers to collaborate across fields and facilities in Japan and overseas to develop promising drug discovery seeds for human and animals based on the concept of One Medicine to cultivate a new academic field. To promote One Medicine research, we strive to develop human resources able to support management and expedite the entire research process from identification of drug discovery targets to development and cultivation of drug discovery seeds, non-clinical studies, and clinical trials. We will place these individuals in key domestic universities and research institutes with the goal of accelerating drug discovery research globally.

[Division] Division of Animal Medical Science, Division of Data Science, Division of Innovative Modality Development, Division of Advanced Medical Device Development

[Office] Research Management Office

Center for Environmental and Societal Sustainability (CENSS) (Established in April 2024)

The Center for Environmental and Societal Sustainability is dedicated to conducting comprehensive research that spans from fundamental studies on environmental issues and natural resources to advanced applied research to address climate change adaptation and carbon neutrality initiatives. In pursuit of these objectives, we engage in collaboration with stakeholders at local, national, and international levels, striving to fulfill our mission at an advanced level and with prompt realization.

[Division] Division of Environmental Resource Research, Division of Environmental Change Adaptation Research, Division of Social System Research

[Office] Cooperation Office for Carbon Neutrality

Research Infrastructure Support Center

Life Science Research Center (Re-established in April 2018)

Originally established as campus-wide joint education research base in April 2003, the Life Science Research Center (LSRC) was re-established in April 2018 to support educational and dynamic research activities in the field of life sciences. LSRC maintains and furnishes high-end, large-scale research equipment that would otherwise be arduous for individual faculty members to procure and maintain or whose upkeep and management can pose a great burden. Another major mission is to support a research environment under strict compliance with all relevant regulations regarding animal experiments, handling of bacterial pathogens, and use of radioactive isotopes. LSRC provides researchers a safe and access-friendly research environment that reduces their maintenance task and facilitate their research.

[Division] Division of Genomics Research, Division of Anaerobe Research, Division of Animal Experiment, Division of Instrumental Analysis, Division of Radioisotope Experiment

[Joint Research Course] Division of Anti-Oxidant Research

Technical Center of Gifu University (Established in April 2020)

The primary goal of the Technical Center of Gifu University is to contribute to the university's academic excellence by providing technical support in education and research, enhancing the skills of technical staff, and implementing the transfer of knowledge and expertise to the next generation. In addition, it collaborates with the Technical Center of Nagoya University within the framework of Tokai National Higher Education and Research System and promotes MEXT'S Tokai Innovation Core Facility Station program to offer the highest level of environment for education and research.

For Society

■ University-Community Collaboration

Agreements with Local Governments

In order to contribute to local community development and the development of human resources, Gifu University actively promotes collaborative activities in a wide range of fields by concluding agreements on collaboration with local governments.

Agreements for Partnership and Cooperation

Local Government/Institution	Date of Agreement	Collaboration Activity *
Ogaki City	March 31, 2006	・ Monozukuri Gifu Techno Fair
Kakamigahara City Kakamigahara Chamber of Commerce & Industry	October 10, 2007	・ Space Engineering Seminar
Hashima City	February 26, 2008	・ Community Leader Practical Training (next-generation community leader fostering program) ・ Delegation of General Project Promotion Coordinator to Policymaking Counselor ・ Delegation of Community Coordinator to City Officials
Gifu Prefecture	March 28, 2008	・ Gifu Prefecture and Gifu University Collaboration Promotion Meeting ・ Industry-Academia-Bank-Government Collaboration Human Resource Development Project ・ Local Government Collaboration-Type Internship ・ Delegation of Community Coordinator to Prefectural Officials
Seki City	September 16, 2008	・ Summer School (common program for COC+ participating universities)
Mino City	December 17, 2008	・ Summer School (common program for COC+ participating universities)
Gifu City	February 27, 2009	・ Accepting City Officials for Community Coordinator Training Program
Takayama City	April 17, 2009	・ Delegation of Community Coordinator to City Officials
Mitake Town	October 28, 2009	・ Cooperation for Low-Carbon Society (by photovoltaic generation, etc.)
Gujo City	March 19, 2012	・ Community Leader Practical Training (next-generation community leader foster program) ・ Summer School (common program for COC+ participating universities) ・ Delegation of Community Coordinator to City Officials
Minokamo City	September 18, 2015	・ Joint Research for Afforestation by Goats
Kitagata Town	November 20, 2015	・ Education, Culture and Sports Promotion Projects
Nakatsugawa City	December 15, 2015	・ Community Leader Practical Training (next-generation community leader foster program) ・ Delegation of Community Coordinator to City Officials
Ibigawa Town	January 19, 2016	・ Regional Revitalization for Ozu District
Ginan Town	January 29, 2016	・ Delegation of Community Coordinator to Town Officials
Motosu City	May 27, 2016	・ Human Resources Development Projects
Yamagata City	July 1, 2016	・ Promotion of community-school collaboration
Toki City	August 2, 2016	・ Community Leader Practical Training (next-generation community leader foster program)
Yoro Town	October 14, 2016	・ Drafting Lifelong Learning Basic Plan
Yaotsu Town	December 1, 2016	・ Revitalization of Mountainous Rural Areas
Kasamatsu Town	April 17, 2017	・ Polyhedron Exhibition at Kasamatsu Museum of History and Future
Gero City	November 24, 2017	・ Cooperation for Regional Support for Children with Special Needs
Shirakawa Village	January 22, 2018	・ Cooperation for Shirakawago Gakuen School Training
Tajimi City	October 9, 2018	・ Revitalization for Nagase Shopping Mall
Kaizu City	March 4, 2019	・ Education and Culture Promotion Projects
Mizuho City	December 24, 2019	・ Human Resources Development and Regional Revitalization Projects
Hida City	February 28, 2020	・ Summer school (common program for COC+participating universities)
Mizunami City	March 10, 2020	・ Regional Revitalization Projects
Wanouchi Town	October 22, 2021	・ Support and advice for disaster prevention and environmental policies
Ono Town	June 29, 2022	・ Discussions for the size of elementary, junior high schools and allocation of teaching staff
Sakahogi Town	October 5, 2022	・ Advice, evaluation, instructions for community schools
Sekigahara Town	October 31, 2022	・ Promotion of regional medicine by Sekigahara Hospital and others.
Anpachi Town	October 31, 2023	・ Support and advice for public transportation
Tarui Town	December 12, 2023	・ Support and advice for athletic parks
Godo Town	January 22, 2024	・ Delegation of Community Coordinator to town official
Ikeda Town	February 13, 2024	・ Students' participation in an event
Shirakawa Town	March 14, 2024	・ Contract research on housing environment, support for the promotion of community-school collaboration activities
Kawabe Town	March 26, 2024	・ Support and advice for disaster prevention, community-building, and realignment of elementary schools
Ena City	April 11, 2024	・ Implementation of Machinaka Open College

* In addition to the activities above, many Gifu University faculty members cooperate with local municipalities as members of advisory bodies, committees and instructors.

Individual Agreements After Signing Comprehensive Partnership Agreements

Local Government/Institution	Date of Agreement	Collaboration Activity *
Ibigawa Town	February 26, 2024	GU Students Regional Settlement Project

Promotion of Collaboration Projects with the Community

Since 2014, as part of its University COC (Center of Community) projects, the university has promoted interdisciplinary cooperation, efforts to reinforce interdisciplinary and inter-department collaboration, and collaborative study with parties such as local governments, NPOs, community organizations, and private companies. The university has also actively promoted efforts to contribute to the solution of local community problems through Local Community–Oriented Education Research Projects.

* Jointly established "Gifu Center for Collaborative Activities between Communities and Schools" with Gifu Prefecture

Extension Course

Extension Course

The faculties and centers of Gifu University have opened various extension courses with the aim of contributing to the advancement of education and culture in the region while sharing its achievements in education and research with the community. In the extension courses for students in elementary school, junior and senior high school, Gifu University also provides hands-on workshops for monozukuri (making things, manufacturing). The extension courses available for 2023 are as follows:

- Lifelong Learning Course for Working People 10 courses
- Extension Course/Hands-on Workshop for Students in Elementary School, Junior and Senior High Schools 27 courses

Symposium and Forum

Gifu University Symposium

As a hub for regional knowledge, Gifu University holds lectures to disseminate the latest information about the initiatives, achievements and the research results of Gifu University.

Gifu University Forum

Gifu University regularly holds lectures delivered by top researchers who have made great contributions to the development of each academic field.

City College Program

Gifu University City College Program

Gifu University implements Gifu University City College Program at the Gifu Chunichi Culture Center. It is a joint program with the Chunichi Shinbun Co., Ltd. Faculty members of Gifu University deliver lectures on themes related to society and life.

Senior High School-University Collaboration

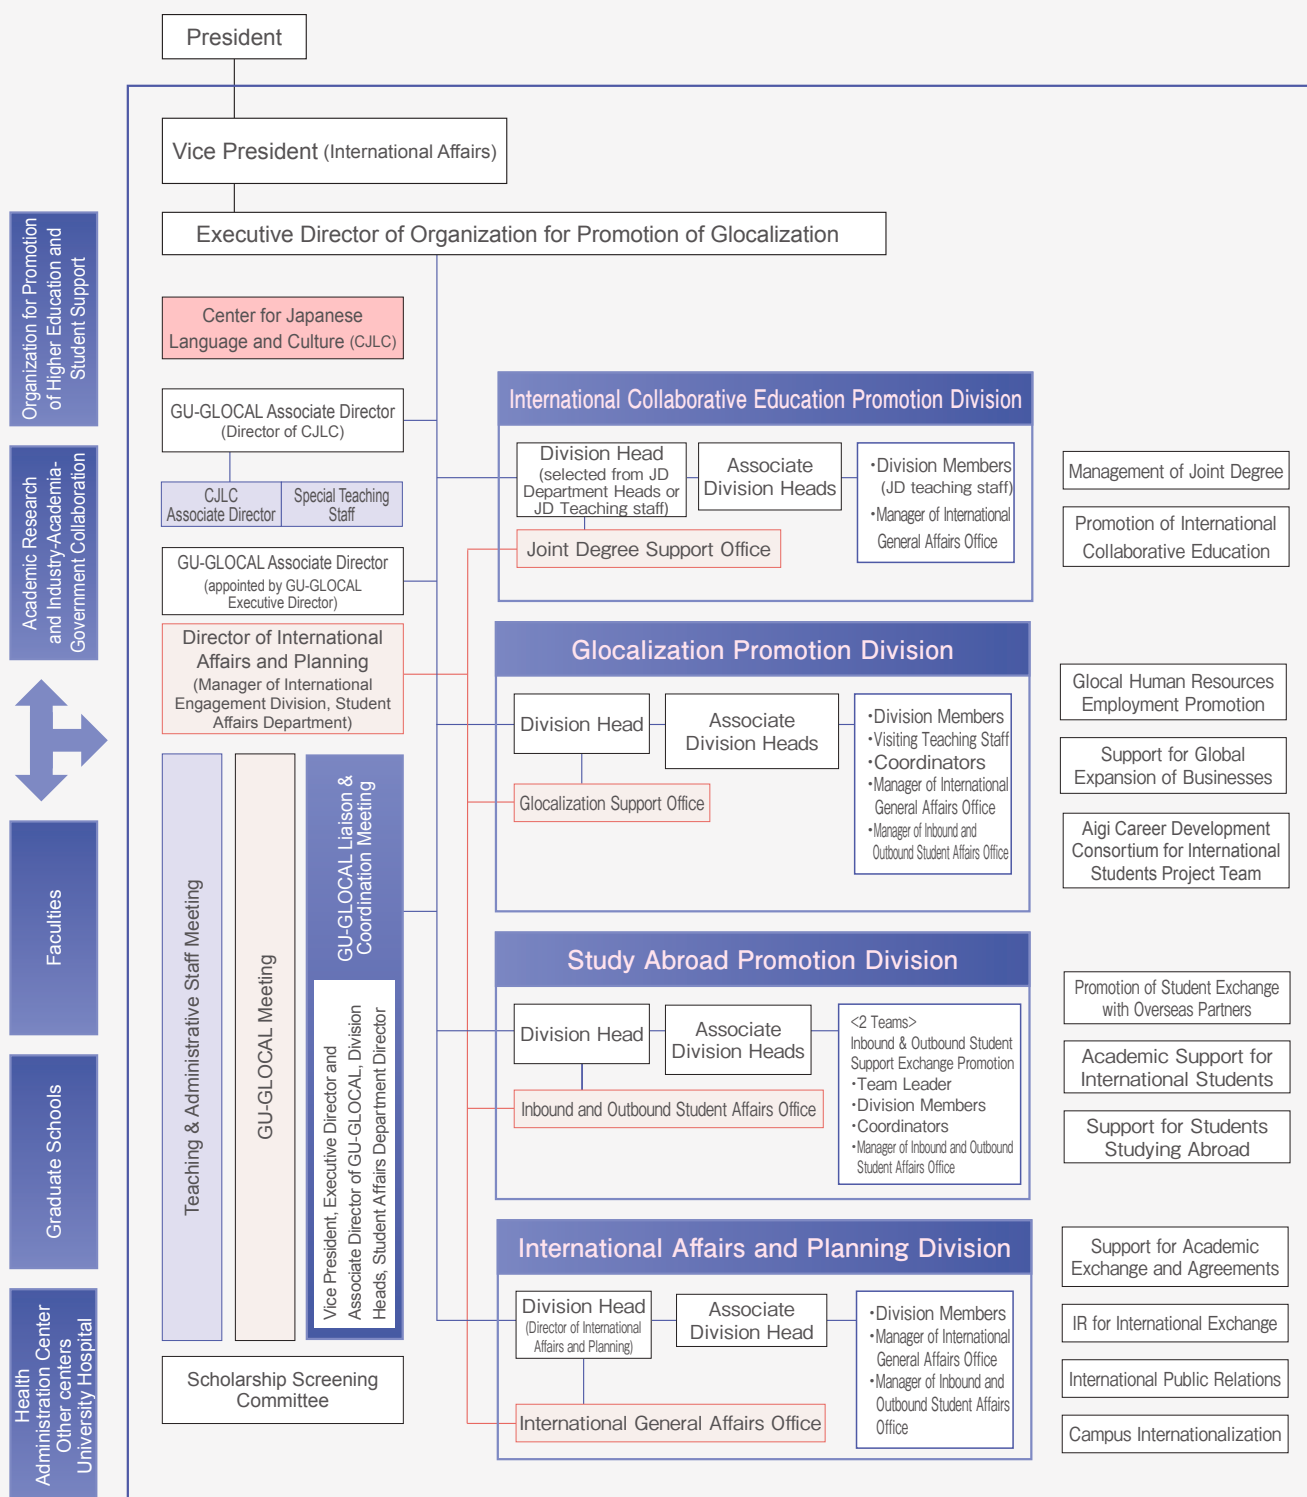

Gifu University collaborates with local senior high schools and encourages senior high school students to develop a deep understanding of a wide range of research fields. Gifu University promotes activities for mutual understanding between senior high schools and Gifu University regarding current education through projects aiming to motivate students to learn, along with the exchange of opinions with senior high school officials.

[Achievements in 2023]

- Visiting Lectures in Senior High Schools 75 courses
(Courses for 2023 are a total of 231 including 30 Humanities Courses, 15 Social Science Courses, 31 Science Courses, 96 Applied Biological Sciences Courses, 37 Medical and Welfare Courses, and 22 Comprehensive Courses.)
- Gifu Network University Consortium (Senior High School-University Collaboration, Information Exchange Meeting)
 - The 1st Seminar for Senior High School-University Collaboration (November 10, 2023)
- Space Engineering Seminar
Participants: 89 students from 17 senior high schools, technical high schools within Gifu Prefecture
Opening Ceremony: June 25, 2023
A total of 9 seminars + Inspection Tour were held (July 12 - November 15, 2023)
Closing Ceremony: December 16, 2023
- Super High School Session
Participants: 43 students from 16 senior high schools within Gifu Prefecture
1st Group Work (June 18, 2023)
2nd Group Work (July 16, 2023)
3rd Report Session (September 9, 2023)

■ Researchers Inbound / Outbound

Number of Foreign Researchers and Visitors Accepted

2023

Foreign Researchers	10
Foreign Visitors	97

Number of Gifu University Faculty's Overseas Travels

2023

Business Trip	377
Training	20

* excluding part-time staff

■ International House

Name	Room Type		
	Rooms		Others
International House (1-1 Yanagido, Gifu City)	Building A	31 Single Rooms	Conference Rooms, Training Rooms, Lounge
		2 Couple Rooms	
		3 Family Rooms	
	Building B	38 Single Rooms	Multipurpose Room, Japanese Room
		12 Couple Rooms	
		4 Family Rooms	
	Building C	11 Single Rooms	
		2 Couple Rooms	
		4 Family Rooms	

■ Center for Japanese Language and Culture

The Center for Japanese Language and Culture educates international students in Japanese language and culture and Japanese students in international understanding. The center plays an important role in the university's internationalization initiatives with a special focus on the promotion of intercultural exchange among students. To this end, the center provides cross-cultural communication programs in general education courses for both Japanese and international students. The Exchange Lounge in the center serves as a venue for interchange between Japanese and international students; a wide range of activities including learning, academic support by student monitors, and information gathering and distribution for studying abroad are organized there.

■ Overseas Office

Gifu University has established overseas offices aiming to promote exchange with international students and researchers.

Gifu University Shanghai Office (China)

999-45 Yuquing Road, Shanghai 201315, People's Republic of China
Tel: 86-21-58124777
Fax: 86-21-58124778

Gifu University Dhaka Office (Bangladesh)

University of Dhaka
Ramna, Dhaka 1000, Bangladesh

Gifu University Office in Sebelas Maret University (Indonesia)

Sebelas Maret University
Jalan Ir. Sutami 36 A, Surakarta, 57126, Indonesia

Program Office between Gifu University and Guangxi University (China)

Guangxi University
100 Daxue Road, Nanning, Guangxi, People's Republic of China

■ Board Members

Members of the Board	
President	YOSHIDA Kazuhiro
Vice President (General Manager) (Academic Research/ Institutional Research (IR)/ Industry, Academia and Government Collaboration/ Regional Revitalization/ Startups Promotion/ Finance)	WANG Zhigang
Vice President (Promotion of Regional Collaboration (SPARC)/ General and Personnel Affairs/ Harassment Response/ Facilities Development and Maintenance)	SUGIYAMA Makoto
Vice President (Policy Planning/ Evaluation/ Development of Information Infrastructure and Digital University (DU)/ Regal Affairs, Research Integrity and Risk Management)	KAMBARA Shinji
Vice President (Academic Affairs/ Student Support/ (Deputy in Charge for) Promotion of Regional Collaboration (SPARC))	MASHIKO Norifumi
Vice President (Promotion of Diversity and Gender Equality/ Promotion of Human Rights/ Public Relations and Branding/ Funds Management/ Library Management)	OYABU Chihoh
Vice President (Global Outreach and Engagement/ (Deputy in Charge for) Promotion of Diversity and Gender Equality/ (Deputy in Charge for) Library Management)	LIM Lee Wah
Director of the Hospital	AKIYAMA Haruhiko

() indicates the number of women and is included in the total. The number of Specially Designated Teaching Staff shown in the table represents the full-time positions only.

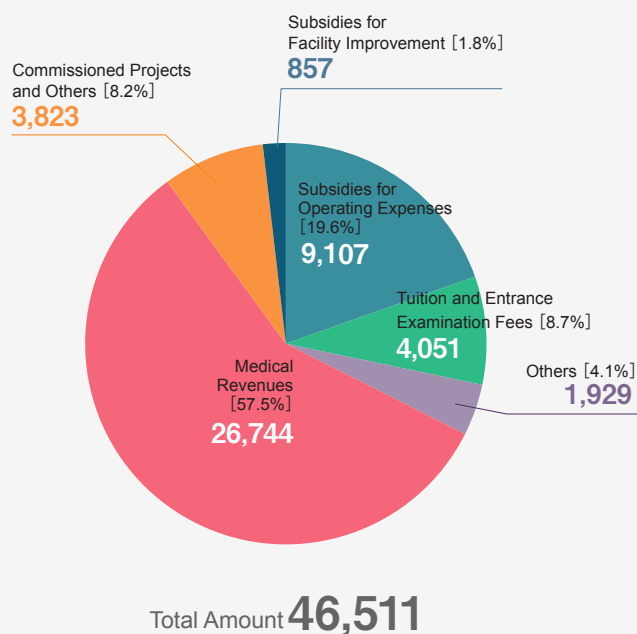

Component Ratio of Teaching and General Staff

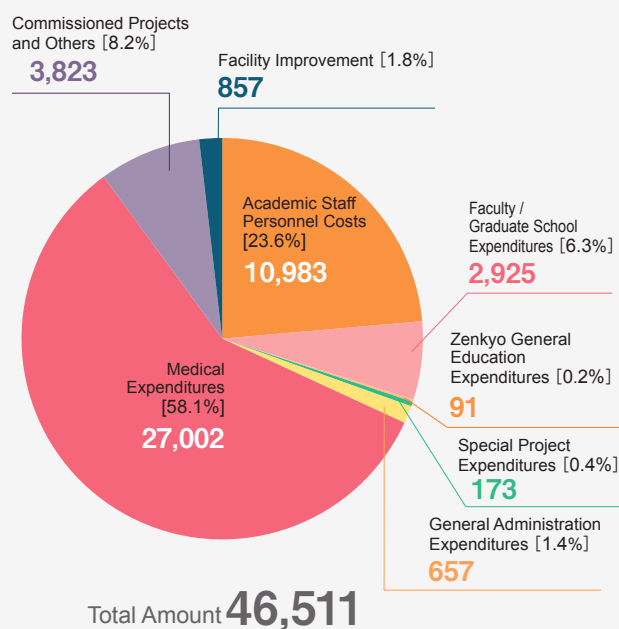

Budget

Gifu University Budget for 2024 (Unit: Million Yen)

[Revenues]

[Expenditures]

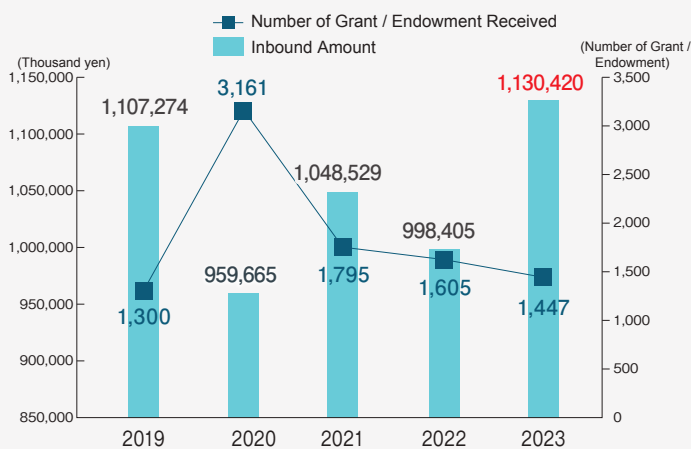

Endowment

2023 Grant and Endowment (Unit: Thousand Yen)

Classification	Number of Grant / Endowment Received	Amount
Gifu University Fund	686	68,903
Central Administration Office	0	0
Faculty of Education	18	19,218
Gifu University Faculty of Education Affiliated Compulsory School System (Elementary - Junior High)	4	24,250
Faculty of Regional Studies	19	4,841
School of Medicine	271	567,574
University Hospital	107	119,652
Faculty of Engineering	145	127,942
Faculty of Applied Biological Sciences	145	71,353
School of Social System Management	4	3,000
United Graduate School of Drug Discovery and Medical Information Sciences	4	11,500
Institute for Advanced Study	20	51,205
Institute for Glyco-core Research	4	52,723
Center for Collaborative Study with Community	1	140
River Basin Research Center	8	5,500
University Library	6	416
Organization for Promotion of Higher Education and Student Support	2	800
Information & Communications	1	300
Intelligent Production Technology Research & Development Center for Aerospace	2	1,100
Total	1,447	1,130,420

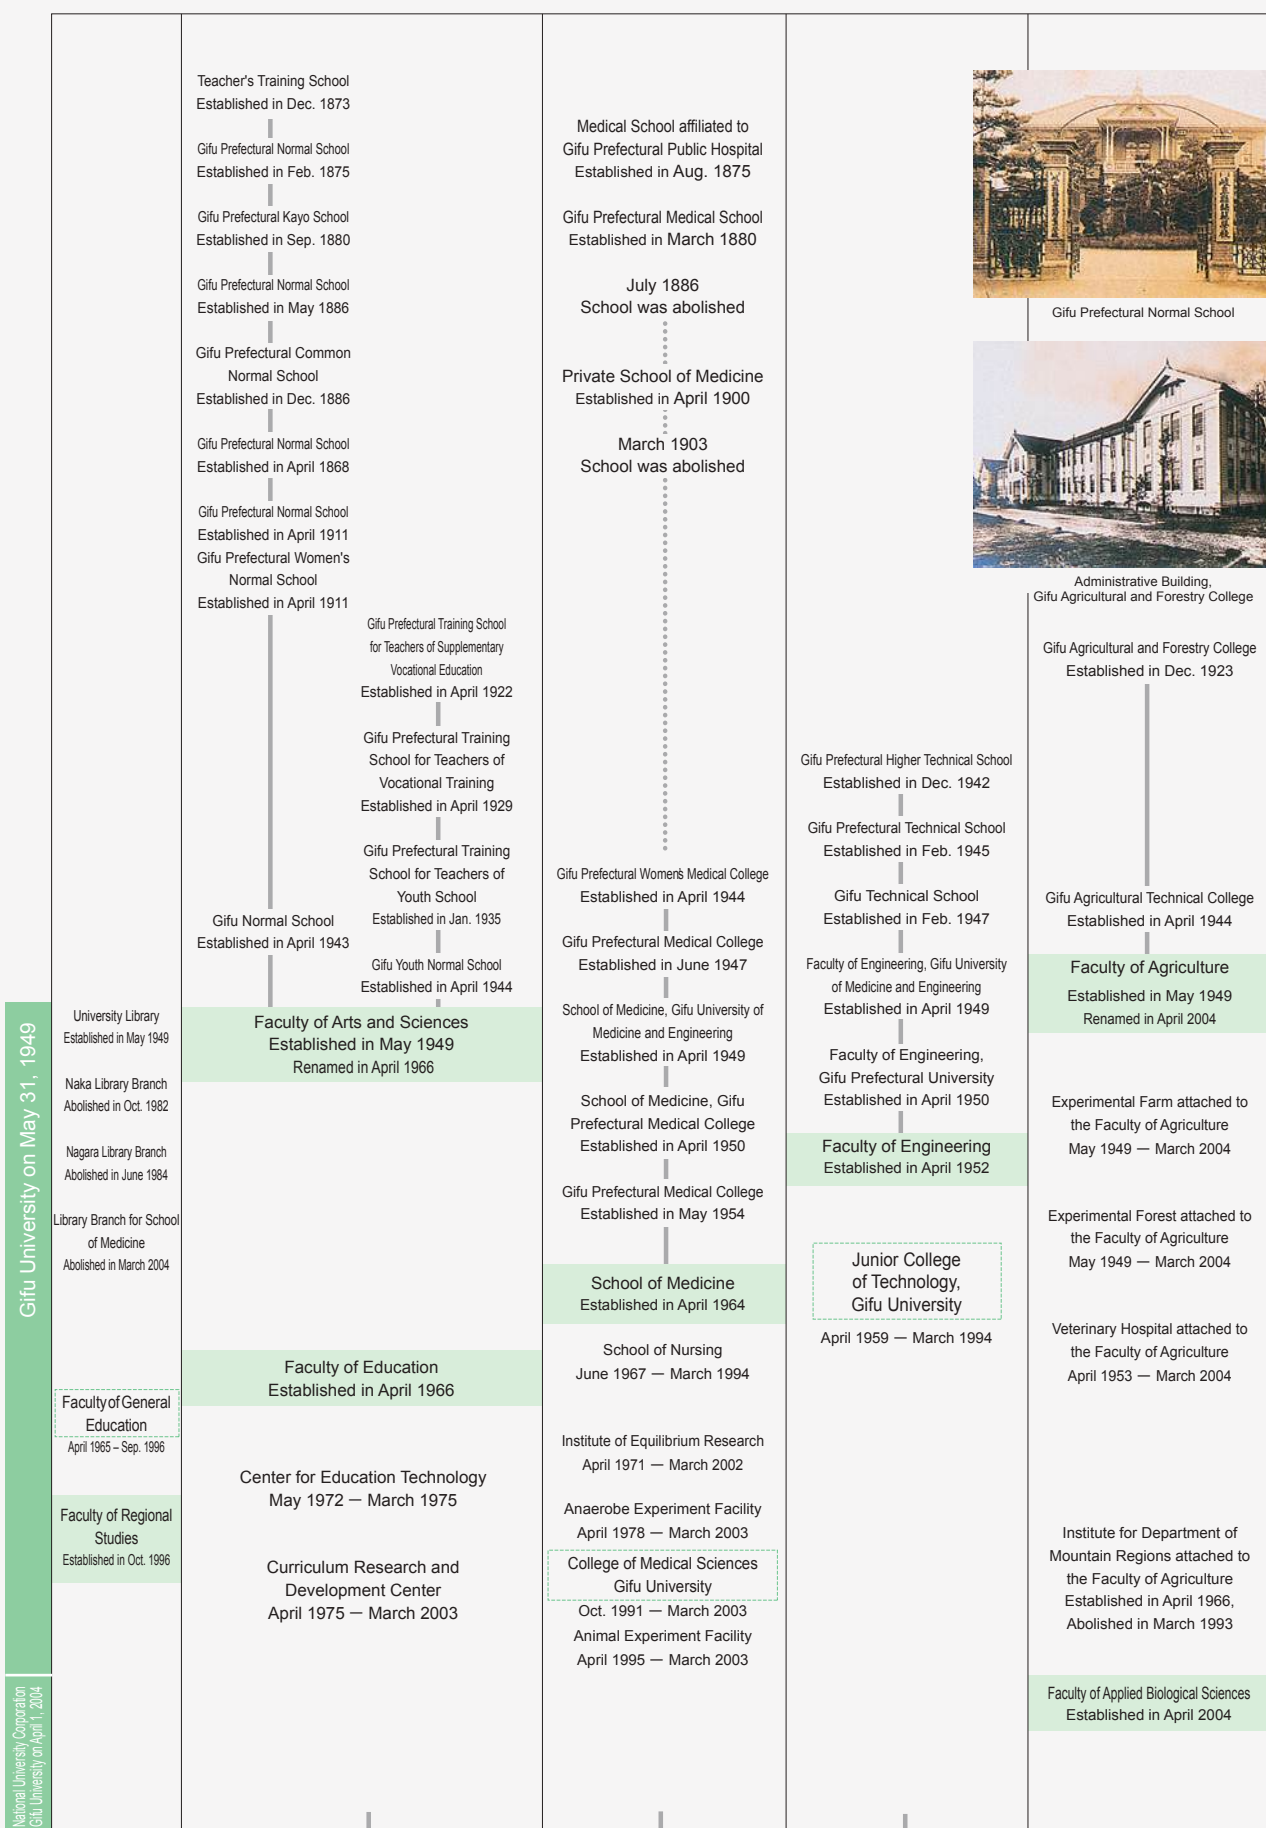

Fractions smaller than a thousand yen rounded down. It includes ¥356.5 million for the Departments of Integral Medicine in the School of Medicine ¥6.7 million for the endowed research division in the Graduate School of Drug Discovery and Medical Information Science.

* The expenses do not always coincide with the actual amount because fractions smaller than a thousand yen is rounded down.

The increase in the number of grants in 2020 can be attributed to the university's requests for financial contributions toward the Student Support Programs to Combat COVID-19.

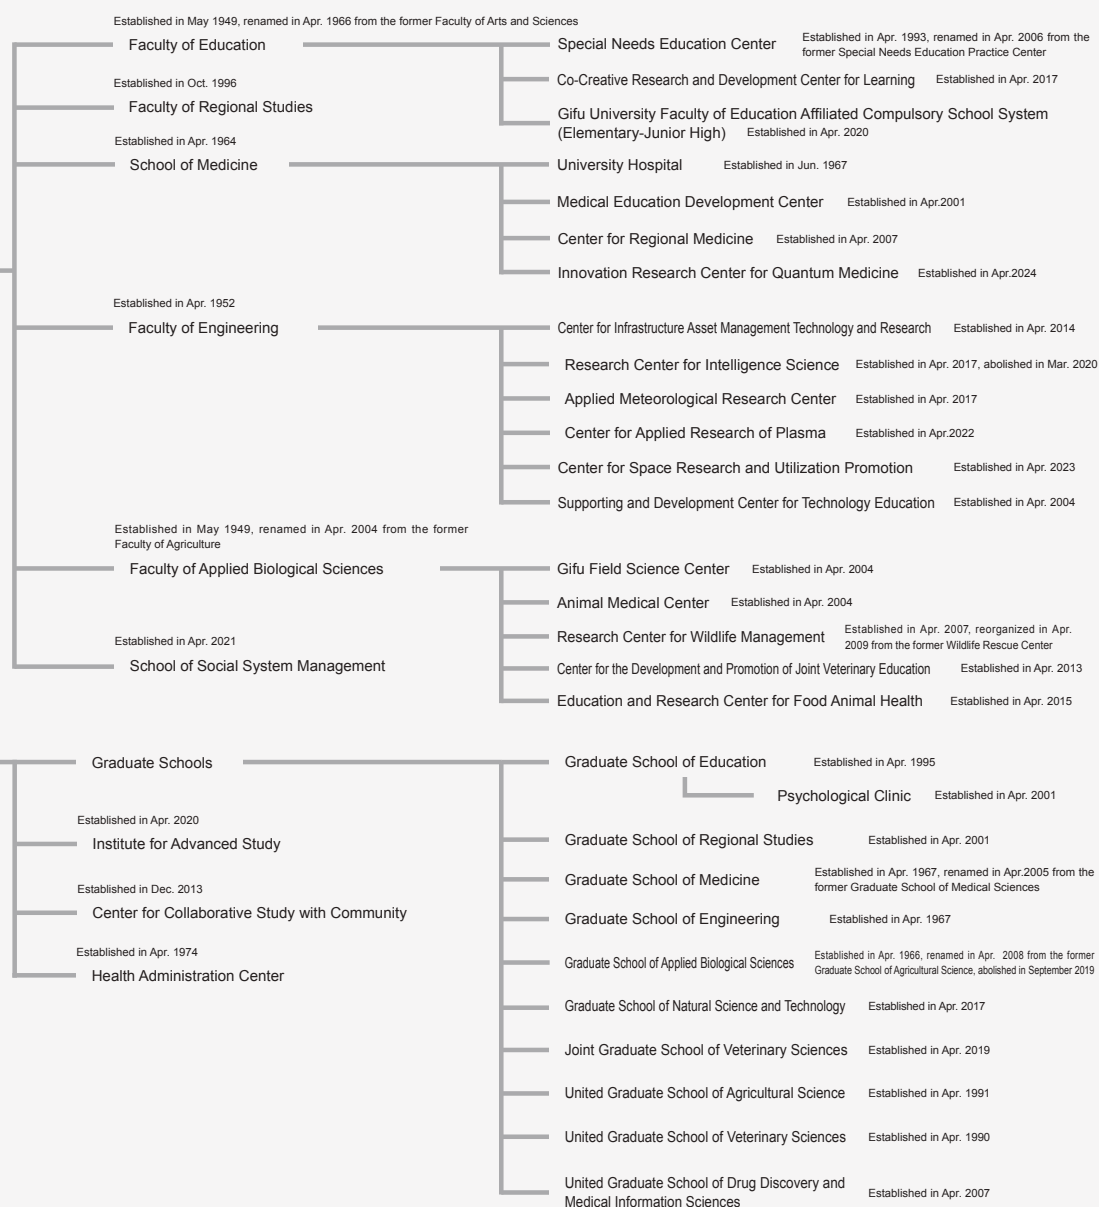

History

Presidents Past and Present

1 st President	AOKI Bunichiro	May 31, 1949	—	July 1, 1954
Acting President	TAKAHASHI Teizo	July 1, 1954	—	May 31, 1955
2 nd President	YOSHII Yoshiji	June 1, 1955	—	May 31, 1961
3 rd President	SHIKATA Hiroshi	June 1, 1961	—	May 31, 1967
4 th President	IMANISHI Kinji	June 1, 1967	—	May 31, 1973
5 th President	HAYASHI Kaneo	June 1, 1973	—	May 31, 1977
6 th President	TACHI Masatomo	June 1, 1977	—	May 31, 1983
7 th President	HAYANO Saburo	June 1, 1983	—	May 31, 1989
8 th President	KATO Akira	June 1, 1989	—	May 31, 1995
9 th President	KINJO Toshio	June 1, 1995	—	May 31, 2001
10 th President	KUROKI Toshio	June 1, 2001	—	March 31, 2008
11 th President	MORI Hideki	April 1, 2008	—	March 31, 2014
12 th President	MORIWAKI Hisataka	April 1, 2014	—	March 31, 2022
13 th President	YOSHIDA Kazuhiro	April 1, 2022	—	Present

Reestablished as Tokai National Higher Education and Research System Gifu University on April 1, 2020
